

NAMITH NAGARAJ

Irvine, CA | 949-739-9364 | namithnagaraj3@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Results oriented Business Data Analyst with an MS in Business Analytics and deep expertise in SQL, Python, Tableau, Power BI and AWS. Proven track record of building scalable ETL pipelines, predictive models and automated reporting dashboards that delivered over \$1.5M in cost savings and cut reporting turnaround time by 30%. Experienced in translating complex datasets into executive level business insights across Agile environments with strong stakeholder management and data storytelling.

TECHNICAL SKILLS

Languages & Analysis: Python (Pandas, NumPy, Scikit-learn, Statsmodels), R (Dplyr, Ggplot2), SQL (CTEs, Window Functions, Stored Procedures, Query Optimization), SAS

Visualization & Reporting: Tableau (LOD Expressions, Dynamic Parameters), Power BI (Advanced DAX, Data Modeling), Amazon QuickSight, Excel (VBA, Power Query)

Cloud, ETL & Warehousing: AWS (S3, Glue, Athena), Snowflake, Alteryx Designer, SQL Server (SSMS), Azure Data Factory, Google BigQuery

Project & Collaboration: Jira, Confluence, Git/GitHub, Agile/Scrum Methodologies, Microsoft 365 (SharePoint, Teams), Slack

Statistical & ML Methods: A/B Testing, Time Series Forecasting (ARIMA, Prophet), Regression Analysis, Random Forest, Gradient Boosting, Hypothesis Testing, Cohort Analysis

PROFESSIONAL EXPERIENCE

Kaiser Permanente | Pasadena, CA

Jan 2025 – Sep 2025

Business Data Analyst

- Developed Time Series Forecasting models using Python (ARIMA, Prophet) to predict call center staffing demand and achieved a **12%** reduction in SLA breaches through improved workforce capacity planning.
- Designed and maintained SQL data extraction pipelines that fed real-time Tableau dashboards and enabled executive stakeholders to independently monitor KPIs without relying on manual reporting.
- Automated weekly reporting workflows in Python using reusable templates and reduced manual reporting effort by **30%** while improving data accuracy across all SLA tracking processes.
- Performed cost-benefit analysis on workforce allocation strategies and identified **\$162K** in operational savings by aligning staffing capacity with peak call volume demand patterns.
- Created SOPs and data documentation for Power BI and Tableau reporting standards and presented findings to business leaders to drive consistent adoption of data-driven decision making.

Amazon | Bengaluru, IN

Oct 2023 – May 2024

Data Analyst

- Led a Data Quality and Governance initiative using SQL and GeoStudio to cleanse and standardize geospatial address datasets and improved last-mile delivery accuracy across logistics operations.
- Delivered **\$1.5M+** in annual operational savings by resolving large-scale data quality defects and optimizing logistics performance metrics through systematic data validation and cleansing processes.
- Built and maintained Tableau KPI dashboards to track SLA compliance in real time and provided leadership with clear visibility into operational bottlenecks and delivery performance trends.
- Collaborated with engineering and operations teams in an Agile framework using Jira for sprint planning, issue tracking and incident resolution workflows to ensure on-time project delivery.
- Wrote automated SQL validation scripts to detect data anomalies early in the pipeline and established new data consistency protocols that prevented recurring data integrity incidents.

Ernst & Young (EY) | Bengaluru, IN

Jun 2022 – Jun 2023

Data Analyst

- Built enterprise grade Power BI dashboards with advanced DAX calculations, drill through reports and dynamic slicers that enabled client teams to perform self-service BI analysis and reduced dependency on manual reporting by **40%**.

- Designed and deployed end-to-end ETL pipelines to extract and transform large-scale datasets from SharePoint and SQL Server and maintained data integrity across staging and production environments.
- Drove Agile methodology adoption within the analytics team by leading sprint planning sessions, daily stand-ups and retrospectives while keeping all deliverables documented for UAT review and sign-off.
- Automated repetitive reporting workflows using Power Automate and PowerApps and saved the team **15+** hours per week while significantly reducing manual error rates across cross-functional reporting processes.
- Conducted QA validation and data reconciliation across staging and production environments to verify reporting logic and ensure seamless releases with full data accuracy and UAT compliance.

PROJECTS

Customer Churn Prediction & Cohort Analysis | *Independent Portfolio Project*

- Architected a Snowflake data warehouse schema to consolidate raw customer transaction data and performed Cohort Analysis along with Customer Lifetime Value segmentation using advanced SQL Window Functions.
- Trained a Python-based churn classification model using Scikit-learn and built a Tableau dashboard to visualize retention opportunities and recommend targeted interventions projected to reduce churn by **15%**.

AWS Sales Compensation ETL Pipeline | *University of California, Irvine*

- Built a serverless ETL pipeline on AWS using S3, Glue and Athena to ingest and transform high-volume sales datasets and reduced SQL reporting turnaround time by **25%** through query optimization with table partitioning and indexing.
- Developed interactive and parameterized Amazon QuickSight dashboards to track sales quota attainment and regional performance metrics for business stakeholders across the organization.

Strategic Market Analysis & A/B Testing | *University of California, Irvine*

- Built a multi-source data blending workflow in Alteryx Designer by integrating U.S. Census data with market spend information and performed geospatial analysis to identify high-value regional market segments.
- Conducted A/B Testing and multivariate regression analysis in R to measure ad-channel effectiveness and identified strategies that produced a **30%** uplift in customer engagement across target markets.

EDUCATION

MS, Business Analytics, University of California, Irvine

2025

- VP of Operations, Merage Analytics Club

BTech, Electronics & Communication, Christ University

2022

- Head of Student Welfare Organisation (SWO)
- Member, IEEE Community

CERTIFICATIONS

- Microsoft Certified Power BI Data Analyst Associate (PL-300)
- Microsoft Certified Fabric Analytics Engineer Associate (DP-600)
- Alteryx Designer Core Certified
- McKinsey Forward Program
