SUMMARY

Data Analyst with 3+ years of experience delivering \$1.5M+ in measurable business impact across healthcare, e-commerce, and consulting. Proficient in SQL, Python, Tableau, Power BI, and Excel with deep expertise in data extraction, data cleaning and wrangling, ETL pipeline development, data modeling, statistical analysis, and business intelligence reporting. Skilled at turning complex datasets into clear, data-driven insights that help cross-functional stakeholders make faster and better decisions. MS in Business Analytics, UC Irvine.

WORK EXPERIENCE

Kaiser Permanente

Data Analyst

January 2025 – September 2025

- Developed ARIMA and Prophet time series forecasting models in Python to predict call center staffing demand across 10+ departments, translating data-driven insights into capacity planning decisions that reduced SLA breaches by 12% and improved operational efficiency.
- Engineered automated SQL data extraction pipelines feeding real-time Tableau KPI dashboards for 50+ business users and C-suite stakeholders, eliminating manual weekly reporting, improving data integrity, and cutting turnaround time by 60%.
- Conducted cost-benefit and variance analysis using Python and Excel (Pivot Tables, VLOOKUP, Power Query), driving process improvement initiatives that uncovered \$162K in annual savings by aligning workforce capacity to historical peak demand patterns.
- Streamlined recurring SLA reporting workflows in Python, reducing manual analyst effort by 30% while strengthening data governance, consistency, and reproducibility across all business intelligence reporting processes.

Amazon

Data Analyst

October 2023 – May 2024

- Spearheaded a data quality and governance initiative using SQL and GeoStudio to perform data cleaning, deduplication, and standardization of 10M+ address records, improving last-mile delivery accuracy and generating \$1.5M+ in annual operational savings.
- Deployed automated SQL validation and anomaly detection scripts across data ingestion pipelines, establishing root cause analysis frameworks and data governance protocols that eliminated recurring data integrity incidents across logistics operations.
- Maintained 5+ real-time Tableau KPI dashboards tracking SLA compliance and route efficiency, performing ad hoc analysis and presenting data-driven insights to operations leadership to enable faster, evidence-based decision-making.
- Collaborated cross-functionally with engineering and operations stakeholders in Agile sprints using Jira, leading requirements gathering sessions and owning data deliverables end-to-end from sprint planning through UAT sign-off.

Ernst & Young (EY)

Data Analyst

June 2022 – June 2023

- Delivered 20+ enterprise Power BI dashboards with advanced DAX, drill-through reports, and dynamic slicers for financial services clients with 40+ daily active users, reducing manual reporting dependency by 40% through self-service business intelligence.
- Implemented end-to-end ETL pipelines using Azure Data Factory and SQL Server to perform data extraction, transformation, and data modeling of large-scale datasets, maintaining full data integrity across staging and production environments.
- Transformed reporting workflows for 3 business units using Power Automate and PowerApps, saving 15+ hours per week of manual effort and reducing cross-functional reporting error rates by an estimated 25%.

PROJECTS

Customer Churn Prediction & Cohort Analysis | Python, Snowflake, SQL, Tableau, Scikit-learn

- Architected a Snowflake data warehouse using advanced SQL window functions to perform cohort analysis and CLV segmentation across 100K+ customer records. The resulting Scikit-learn churn classifier achieved 87% accuracy and projected a 15% reduction in churn through targeted, data-driven re-engagement campaigns.

AWS Sales Compensation ETL Pipeline | AWS S3, Glue, Athena, Amazon QuickSight

- Constructed a serverless ETL pipeline on AWS (S3, Glue, Athena) for data extraction and transformation of high-volume sales datasets, cutting SQL reporting turnaround by 25% through query optimization and table partitioning. Delivered parameterized QuickSight dashboards that gave stakeholders real-time KPI tracking and regional revenue visibility.

A/B Testing & Market Sizing Analysis | R, Alteryx, U.S. Census Data

- Executed A/B tests and multivariate regression analyses in R across 5+ ad channels to measure campaign effectiveness by audience segment. Blended U.S. Census and market spend data in Alteryx for statistical analysis and market sizing, identifying high-ROI strategies that produced a 30% uplift in customer engagement.

SKILLS

Languages: SQL (CTEs, Window Functions, Stored Procedures, Query Optimization), Python (Pandas, NumPy, Scikit-learn), R, SAS

Visualization & BI: Tableau (LOD Expressions), Power BI (Advanced DAX, Data Modeling), Amazon QuickSight, Excel (VLOOKUP, Pivot Tables, VBA, Power Query, Macros)

Cloud & ETL: AWS (S3, Glue, Athena), Snowflake, Azure Data Factory, Google BigQuery, Alteryx Designer, SQL Server (SSMS)

AI & Automation: Claude AI, ChatGPT, Prompt Engineering, LLM-assisted Analysis, AI Workflow Automation, Power Automate, Zapier

ML & Analytics: Machine Learning, Predictive Modeling, Data Cleaning & Wrangling, Statistical Analysis, KPI Tracking, A/B Testing, Time Series Forecasting, Cohort Analysis, Root Cause Analysis

Collaboration: Agile / Scrum, Jira, Git / GitHub, Requirements Gathering, Stakeholder Reporting, Microsoft 365

EDUCATION

Master of Science, Business Analytics University of California, Irvine

2025

Bachelor of Technology, Electronics & Communication Christ University, Bengaluru

2022

CERTIFICATIONS

Microsoft Power BI Data Analyst (PL-300) | Microsoft Fabric Analytics Engineer (DP-600) | Alteryx Designer Core | McKinsey Forward Program
